**DETAILED ACTION**

1. This is in response to the applicant amendment filed 7/29/04.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6 and 9-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ramachandran, US Patent No. 6,315,195.

Ramachandran discloses a transaction apparatus and method comprising: a portable terminal 14 having a card memory read/write component 48 for reading/writing data to the programmable memory 18 on multifunction card 12, the component 48 also includes electrical contacts which are positioned adjacent to slot 32 in the portable terminal for engaging the contacts 20, which enable communication with the programmable memory 18 of the multifunction card 12; a scanner component 50; a processor 36; a biometric reader component 47 for sensing a characteristic of a user which uniquely identifies the person as an authorized user, the programmable memory of the card preferably includes data representative of the identifying biometric features of the authorized user or users, this stored data is used to enable authorized users of the card to operate the terminal with the card while others are prevented from such operation; a communications component 52, such as a modem or other communications devices that are selectively operative under the control of the processor to

Art Unit: 2876

communicate with other systems and devices located outside and preferably remote from the portable terminal, this may include a connector for communicating through a network 54 to a computer or similar device at a remote location (see col. 8, line 8+).

Ramachandran fails to disclose or fairly suggests the card is a PC type card. However, such limitations fall within the engineering design choice.

It would have been obvious for a person of ordinary skill in the art at the time the invention was made to modify the card into a PC card for storing users' information. Such modification would make the system more convenient wherein the card would be easily compatible to other computing devices. Furthermore, the specific format of the card (i.e. PC format) fails to provide any unexpected results, it just simply a design choice for meeting a specific customer requirement. Therefore, it would have been an obvious extension as taught by Ramachandran.

#### ***Response to Arguments***

4. Applicant's arguments with respect to claims 1-6 and 9-18 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2876

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
